The SO-CAL Step-Boxed™ '32 Frame

All SO-CAL Step-Boxed™ '32 frames use American Stamping rails for strength and authenticity. All frames are numbered and tagged for added value and include the following:

- The strength of an unground fillet weld on the boxing plates.
- Recessed boxing plates which increase clearance for:
 - Brake lines
 - Fuel lines
 - Power cables
 - Exhaust systems
 - Steering components
- A "swept C" in the rear which minimizes the stress of the cut and spreads the load over a greater area.
- A universal trans mount that cleverly accommodates TH350, TH400, 700R4 transmissions as well as 4 or 5-speed manuals.
- Front cross member angled at 7 degrees for correct caster.
- Brake proportioning valve mounting pad
- In-line fuel filter mounting pad
- Rear cross member
- Steering box mount
- Front panhard bracket
- Front brake line tabs
- Master cylinder bracket
- Rear radius rod tabs
- Brake pedal mount
- Hiboy front cross member 1" forward
- F1-style Front shock upper mounting tubes (threaded)
- Rear shock upper mounting tubes

#001-70100 Pinched-nose hiboy base frame with buggy-spring rear suspension.	\$2995.00

#001-70103 Stock-width full fendered base frame with quick change buggy rear suspension.	\$3195.00

NOTE: For those who want something other than a small-block Chevy motor, the SO-CAL Step-Boxed™ frame is now available without engine or trans mounts. It is also available special order with small block Ford or big block Chevy mounts. Call for more information.

Note: Due to all the variations between stock and reproduction bodies SO-CAL Step-Boxed™ '32 frames come without body mounting holes. However, strategically placed under the top rail are welded-in bosses that can be drilled and tapped for body mounting once the position of the body has been finalized in relation to the firewall and the radiator/grille shell.
